

AI Summary - MRA Reporting Requirements Design & Implementation (v1_20260128)

> ****Applicable artifacts referenced****
> • ****Unmapped MRA Requirements v1.8.pdf**** (Final Deliverable; you noted long-term maintenance of the Reporting section) [cite]turn1search2[
> • ****Unmapped MRA Requirements v1.12.pptx**** (DRAFT; expanded, lifecycle-wide requirements incl. reporting, governance, escalation; shows version history and linkages to PTS reporting) [cite]turn3search2[
> • ****Stakeholder Communication Plan - Reporting - 6.2.pptx**** (audiences, messages, channels, POCs, timing for CAO-XIIE.6 rollout) [cite]turn2search1[
> • ****20230705_Unmapped MRA Reporting_Work Effort Managers_Communications.docx**** (direct communication to PMs; sets compliance date and standardized reporting model) [cite]turn3search1[
> • ****Article XIIId & e - CAO-XIIE.6 - Testing Results.pdf**** (pilot sustainability/testing scope, sampling approach, timeline, lessons learned, next steps) [cite]turn2search2[

Role & Context

- ****Role:**** Senior Vice President (Transformation Senior Lead) responsible for defining, operationalizing, and evidencing enterprise-wide ****Unmapped MRA reporting**** under ****Article XII.1.e****, bridging policy/standard requirements with forum-ready reporting that senior management and the Board can review and challenge. Performance reviews and your work-sample registry consistently list you as a primary point for UMRA reporting and related design councils.

[cite]turn1search3[turn1search2[

- ****Regulatory frame & gaps addressed:**** The CAO-XIIE.6 workstream targets ****reporting effectiveness**** and ****tool fragmentation**** gaps (e.g., ****8-7**** “ineffective reporting” and ****8-8**** “siloes/inconsistent tools”), with milestone dates of ****Design 08/16/2022****, ****Business Completion 04/04/2023****, and ****Implementation Complete 10/03/2023****. [cite]turn2search2[

- ****Operating environment:**** Multi-system data landscape (****RET, iCAPS, PTS****), centralized oversight via ****MRA Oversight Function (MRAOF)****, and broad 1LOD/2LOD/3LOD stakeholder set. [cite]turn2search2[turn2search1[

My Core Contributions

1) ****Defined and maintained the Unmapped MRA Reporting requirements****

- Drafted and maintained the ****Reporting**** section of the UMRA requirements through iterative versions, culminating in ****v1.12 (DRAFT)**** which aligns forum reporting to ****PTS SSR + MRA Addendum**** and enumerates ****minimum reporting attributes and checks**** at individual and portfolio levels. (Document owner shown as ****MRAOF****, consistent with centralized governance; your role is drafting/maintenance.) [cite]turn3search2[

- Preserved ****version lineage**** (e.g., ****v1.2: added reporting requirements; v1.8-v1.10: updated/clarified reporting & PTS linkages****), enabling traceability for audit. [cite]turn3search2[

2) ****Authored targeted communications that drove adoption****

- Built the **6.2 communications plan** and **authored the Work Effort Managers email** establishing the **June 15, 2023** compliance date for MRAs in Management Remediation, and operationalizing a **centralized, month-end Standardized MRA report** posted to SharePoint to simplify adherence. [\[cite\]](#)[\[turn2search1\]](#)[\[turn3search1\]](#)

- **Led reporting design councils** and Office Hours to standardize interpretation, data timing, and forum readiness across Org PMOs, Business/Function SPOCs, PMs, and oversight partners. [\[cite\]](#)[\[turn2search1\]](#)

3) **Executed sustainability testing and closed design gaps**

- **Applied** the program's sampling method to test **4 MRAs** from an in-scope population of **33**, validating requirement implementation and forum preparedness; **authored the lessons-learned** and drafted a **BRD** to improve **PTS** **systems-of-record** connectivity where attribute/role discrepancies were observed. [\[cite\]](#)[\[turn2search2\]](#)

4) **Hands-on data enablement and quality control**

- Acted as the **primary data resource** (prior to onboarding a data specialist), routinely working across **RET/iCAPS/PTS** to make sure forum materials included the **required attributes and checks** and to support the standardized reporting cadence. [\[cite\]](#)[\[turn3search1\]](#)[\[turn3search2\]](#)

5) **Governance and approvals (per program structure)**

- Socialized content through **MRAOF** governance and secured approvals through your management chain (**Angelique / Alana** as sponsors/approvers, per your account), ensuring materials were accurate, aligned, and ready for downstream assurance review. (Artifacts show MRAOF as owner/POC and team-issued communications.) [\[cite\]](#)[\[turn2search1\]](#)[\[turn3search2\]](#)

Key Behaviors Demonstrated

- **Systems thinking under regulatory constraints:** Balanced **attribute sufficiency** with **practicality**, keeping the reporting set lean enough to implement while meeting governance and escalation needs; escalated structural data issues via a BRD rather than ad-hoc fixes. [\[cite\]](#)[\[turn2search2\]](#)

- **Change orchestration & stakeholder enablement:** Designed multi-channel comms with explicit **who/what/how/when** and provided **direct PM guidance** via an authored email and FAQs/Office Hours to accelerate adoption. [\[cite\]](#)[\[turn2search1\]](#)[\[turn3search1\]](#)

- **Evidence-based sustainability:** Used a **documented sampling approach** and a time-boxed sustainability period to validate implementation, capture lessons learned, and feed those into requirement updates and system enhancements. [\[cite\]](#)[\[turn2search2\]](#)

- **Execution ownership:** Personally carried **data pulls/QC** and ensured forum packages met the minimum reporting attributes and checks, reducing variance in interpretation and timing. [\[cite\]](#)[\[turn3search1\]](#)[\[turn3search2\]](#)

Skills & Qualities to Highlight in Interviews

- **Regulatory translation to operations:** Turning Article XII.1.e and enterprise policy/standard language into **operational, testable** reporting guidance with forum-specific checks. [\[cite\]](#)[\[turn2search2\]](#)[\[turn3search2\]](#)

- **Structured, scalable communications:** Role-targeted messaging (SPOCs, PMs, Org PMOs, 2LOD/3LOD) with clear **accountabilities**, timelines, and support paths that reduced confusion and improved adoption. [cite]turn2search1[turn3search1]
- **Data and tooling integration:** Bridging **RET/iCAPS/PTS** via requirements and a BRD so reporting can be produced with fewer EUCs and greater consistency. [cite]turn3search2
- **Risk & control mindset:** Designed for **sustainability** and **assurance-readiness** (sampling, lessons learned, governance touchpoints) rather than one-off compliance. [cite]turn2search2

Credibility Notes (assumptions or boundaries)

- **Authorship attribution:** The v1.12 deck lists **MRAOF as owner** and is marked **DRAFT** without named authors. Your role as **primary drafter/maintainer of the Reporting section** is supported by your work-sample registry and performance reviews but is **not water-marked slide-by-slide**; I treat it as **highly likely** and have framed it accordingly. [cite]turn3search2[turn1search2][turn1search3]
- **Approvals:** You indicated **Angelique and Alana** approved the materials; artifacts show **team-level** ownership and POCs. I therefore cite approvals as **managerial sponsorship** per your account rather than as documentary signatures. [cite]turn2search1
- **Outcomes metrics:** The artifacts provide timeline, sampling, and scope, but **no quantified adoption or audit deltas** attributable specifically to you. If you later locate metrics or audit feedback, we can append them. [cite]turn2search2
