

AI Summary - QA Working Group (RBCM 13.1/13.2)

Artifact Date: 2023-09-12 and 2023-10-24

Prepared: 2026-01-29

Work Samples:

- 20230912_CAO-XIIE.13 - Quality Assurance Working Group.pptx
- 20231024_CAO-XIIE.13 - Quality Assurance_ Working Group.pptx

Role & Context

- **Role:** Workstream Lead for **RBCM 13.1 (Unmapped MRA QA)** and **RBCM 13.2 (Other Work Efforts QA)**; led cross-functional design efforts to define a scalable Quality Control Review (QCR) model across Citi's Book of Work (BoW).

📍cite📍turn1search2📍

- **Context:** Existing PM Quality Review Framework (Health Checks, Spot Checks, PQA) emphasized process adherence. Regulators required clearer outcome assurance (CSC/KPIs). The workstream needed to interpret the QA gap, define the in-scope population using BoW segmentation (A-D), and align with concurrent program initiatives (e.g., RBCM 10/12, segmentation cadence).

My Core Contributions

1. **Problem framing to target-state design** - Defined a **scaled QCR approach**: mandatory for **Segments A-C**, optional for **Segment D**; established what/when/how for reviews (phase- and change-control triggers).

📍cite📍turn3search2📍turn3search1📍

2. **Design authorship & oversight** - Oversaw all materials and **authored ~50%**; directed two direct reports (Edison, Denysia) for the remainder. Produced **checklists**, **process flows** (feedback & sponsor acknowledgement), and **reviewer eligibility** (independence, min C12). 📍cite📍turn3search2📍turn3search1📍

3. **Tooling concept ownership** - My team **owned Reviews@Citi wireframes** and notification templates to capture reviewer assessments and evidence of acknowledgement in-system. 📍cite📍turn3search2📍turn3search1📍

4. **Duplication risk mitigation** - Established the principle that **Unmapped MRAs** are exempt from incremental QCRs because they are already subject to **Issue Quality Assurance (IQA)**. 📍cite📍turn3search2📍

5. **Cross-functional alignment under ambiguity** - Facilitated decisions across **CPMC Governing Team, IA/ORM, and PM Oversight**; documented open options (non-PM artifacts in Execute; Do-Not-Proceed gate; Segment A peer vs panel), and timeline through **13.2 business completion**. 📍cite📍turn3search1📍

Key Behaviors Demonstrated

- **First-principles thinking:** Translated a vague QA gap into concrete checks, triggers, and evidence paths aligned to BoW segmentation and lifecycle phases.

📍cite📍turn3search2📍

- **Systems design & de-duplication:** Balanced coverage with reviewer capacity while preventing overlap with IQA/TPO and existing HC/SC/PQA checks.

📍cite📍turn3search2📍turn3search1📍

- **Structured facilitation:** Option-based decisioning, explicit parking-lot tracking, eligibility criteria, and escalation constructs to converge stakeholders.

©turn3search2©turn3search1

- **Executional craftsmanship:** Governance-ready checklists, flows, wireframes, and sample communications to enable implementation hand-off. ©turn3search2

Credibility Boundaries

- This artifact reflects **design leadership**; you **did not own implementation** or post-rollout metrics for 13.2. No claims are made about realized impact metrics beyond design hand-off. ©turn1search2

- Team acknowledgment: Edison and Denysia contributed ~50% of slides under your direction. ©turn1search2

- Several options were still open as of 2023-10-24 (e.g., Segment A model, non-PM artifacts, Do-Not-Proceed gate). ©turn3search1

Source Traceability

- Work sample decks (discussion drafts with PRELIMINARY markings):

- 2023-09-12 Working Group deck - design concepts, QCR flows, Segment B/C checklists, tooling wireframes. ©turn3search2

- 2023-10-24 Working Group deck - Segment A checklist, options (non-PM artifacts, Do-Not-Proceed), stakeholder & timeline updates. ©turn3search1

- Performance reviews corroborating role and scope (RBCM 13.1/13.2 design lead; oversight of working group materials; team ownership of Reviews@Citi wireframes; UMRA exemption principle). ©turn1search2
